

# PM-695 SAVE CELL

## IMPROVES THE PERFORMANCE AND LIFESPAN OF THE SALT CHLORINATOR

**PM-695 SAVE CELL** The ideal, multi-functional product for the setting-up process and water maintenance using saline electrolysis, protecting the incrustation cell, eliminating the phosphates and making the water clearer.

It extends the useful life of the cell, reduces water and electricity consumption and improves the production of disinfectant, thus generating significant financial savings and simplifying pool maintenance.

### METHOD OF USE AND DOSAGE:

- Clean previously the cell using PM-142 CELNET. Immerse the cell at least for 10 minutes and rinse with water.
- Shake to mix before using the product.
- Add 1 L/10 m<sup>3</sup> of PM-695 SAVE CELL during the setting-up process at the beginning of the season.
- Repeat this application at least once every two months and, if the water is significantly replaced, add a proportional part of the product.

### PHYSICAL PROPERTIES:

- Appearance: Ambar suspension
- Odour: Odourless
- pH: 5 – 6
- Density: 1,230 – 1,260 g/cm<sup>3</sup>
- Solubility in water: Miscible in water in all proportions

### HAZARD AND PRECAUTIONARY STATEMENTS:

- May cause an allergic skin reaction.
- Causes serious eye irritation.
- Keep out of reach of children.
- Wear protective gloves and eye protection.
- If on skin: Wash with plenty of water.
- If in eyes: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.
- Dispose of contents/container in accordance with applicable regulations

### PACKAGING:

6, 25 Kg cans
