

PM-401 ESTABILIZADOR

CHLORINE STABILIZER

PM-401 ESTABILIZADOR: Product in granular form that protects the chlorine from being absorbed by sun's ultraviolet rays. This disinfectant with prolonged action is compatible with any type of chlorine. Highly recommended when using sodium hypochlorite and purifying water with salt electrolysis equipment.

METHOD OF USE AND DOSAGE

- Initial dose: Add 30 g/m³ of PM-401 ESTABILIZADOR dissolved in hot water (10 L of water per kg of product) while filtration is working. Slowly add in the skimmer and leave the water circulating for 24 hours so that the product dissolves completely.
- Maintenance dose: Add 15 g/m³ of PM-401 ESTABILIZADOR in mid-season if the cyanuric acid concentration is not higher than 40 ppm.

PHYSICAL PROPERTIES

- Appearance: white crystalline solid
- Odor: None
- pH: 3.0 - 5.0 (aqueous solution 100 g/L)
- Relative density: 1,75 (20 °C)
- Melting point: 320 – 375 °C
- Decomposition temperature: 320°C
- Water Solubility: 2 g/L (20°C)

PRECAUTIONARY STATEMENTS

- Do not get in eyes, on skin, or on clothing.
- If you feel unwell: Call a POISON CENTER or doctor/physician.
- Keep out of reach of children.

PACKAGING

Packed in 1, 4 and 25 Kg
