POOLS

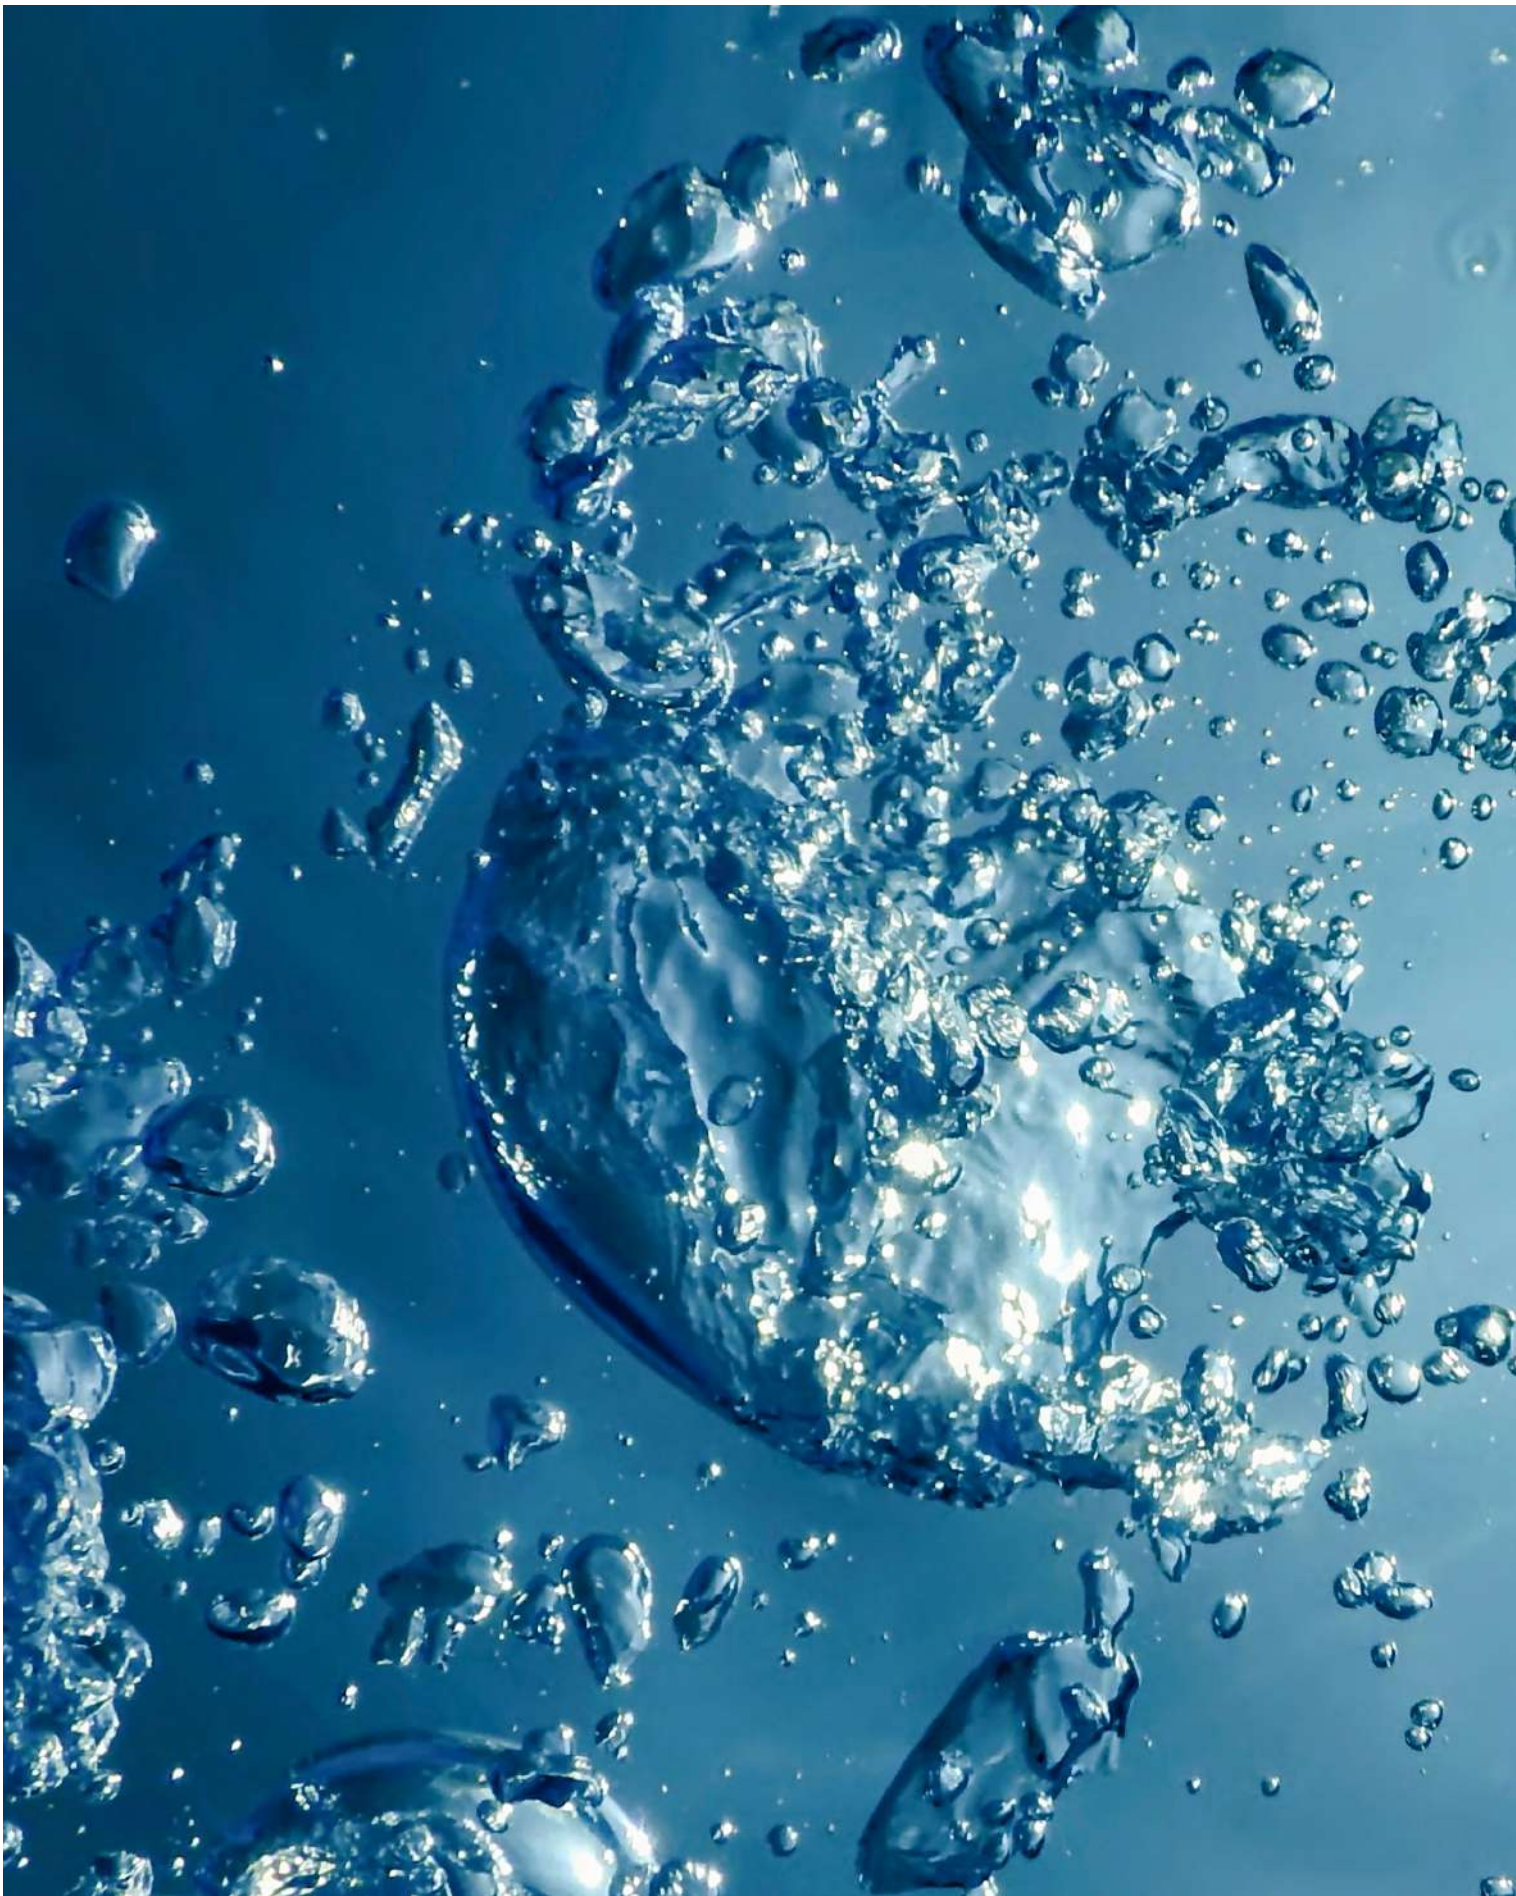

RHINO
POOLS

A black and white photograph showing a close-up of a pool liner. The liner is dark and has a fine, pebbled texture. On the left side, there is a significant tear where the liner has been pulled away, revealing a dark, woven mesh reinforcement underneath. The text "POOLS MADE TO LAST" is centered in the middle of the image in a bold, white, sans-serif font.

ABOUT US

Rhino Pools is a subsidiary company and belongs to a group of companies that have been working with fiberglass since 1998.

2 PRODUCTION SITES ARE WORKING ON:

FIBERGLASS CERAMIC POOLS

Our company has been producing fiberglass pools for over 20 years. In this time, we have developed a unique approach to the production process that allows us to produce high-quality products using only the highest quality raw materials.

Our pool factory produces over 700 pools per year, which are sold through the dealer network throughout Europe, as well as in the East and the Middle East. Today we can proudly say that we have more than 10,000 happy clients enjoying our pools.

ACRYLIC BATHTUB SYSTEMS

Bathtubs are one of the oldest products in the company's product line. Due to the long-lasting know-how, new and modern technologies as well as skilled employees we have developed high-quality ergonomic, modern design products. In manufacturing process, we use only the top-quality English company LUCITE cast sanitary acrylic. For massage systems we use components made by KOLLER, the world-renowned Austrian company.

MOLDS AND MODELS

Over the long years of operation, the company has accumulated vast experience in the mold manufacturing. At present, we are manufacturing molds not only for our needs but also for other enterprises engaged in manufacturing of fiberglass plastic products. Working with foreign partners we have manufactured a large number of molds intended for wind power industry. We are manufacturing not only manual laminating molds but also molds for vacuum laminating with film and vacuum back-sided molds.

WOOD HEATED TUBS

Different sizes and shapes are available, from 180 cm to 200 cm internal diameter, with integrated and separate heating ovens. Available in all color options. High quality hot tubs are manufactured and assembled in several locations in Kaunas, so there is no compromise in the market. Special grade gelcoats are used in the production.

OTHER PRODUCTS

A lot of experience in production of fiberglass plastic products for various purposes, namely:

- Manufacturing of boats and motor boats
 - Manufacturing of various reservoirs
 - Products dedicated to windmill industry
 - Parts and components for machine industry and shipbuilding industry.
-

TECHNOLOGY

Our pools are made to last.

Production begins with manual fiberglass forming using the highest quality materials.

12-layer wall structure, extra ceramic and fiberglass reinforcement layers, double bottom and sprayed-over foam insulation guarantee a long lasting product, which is leakproof forever!

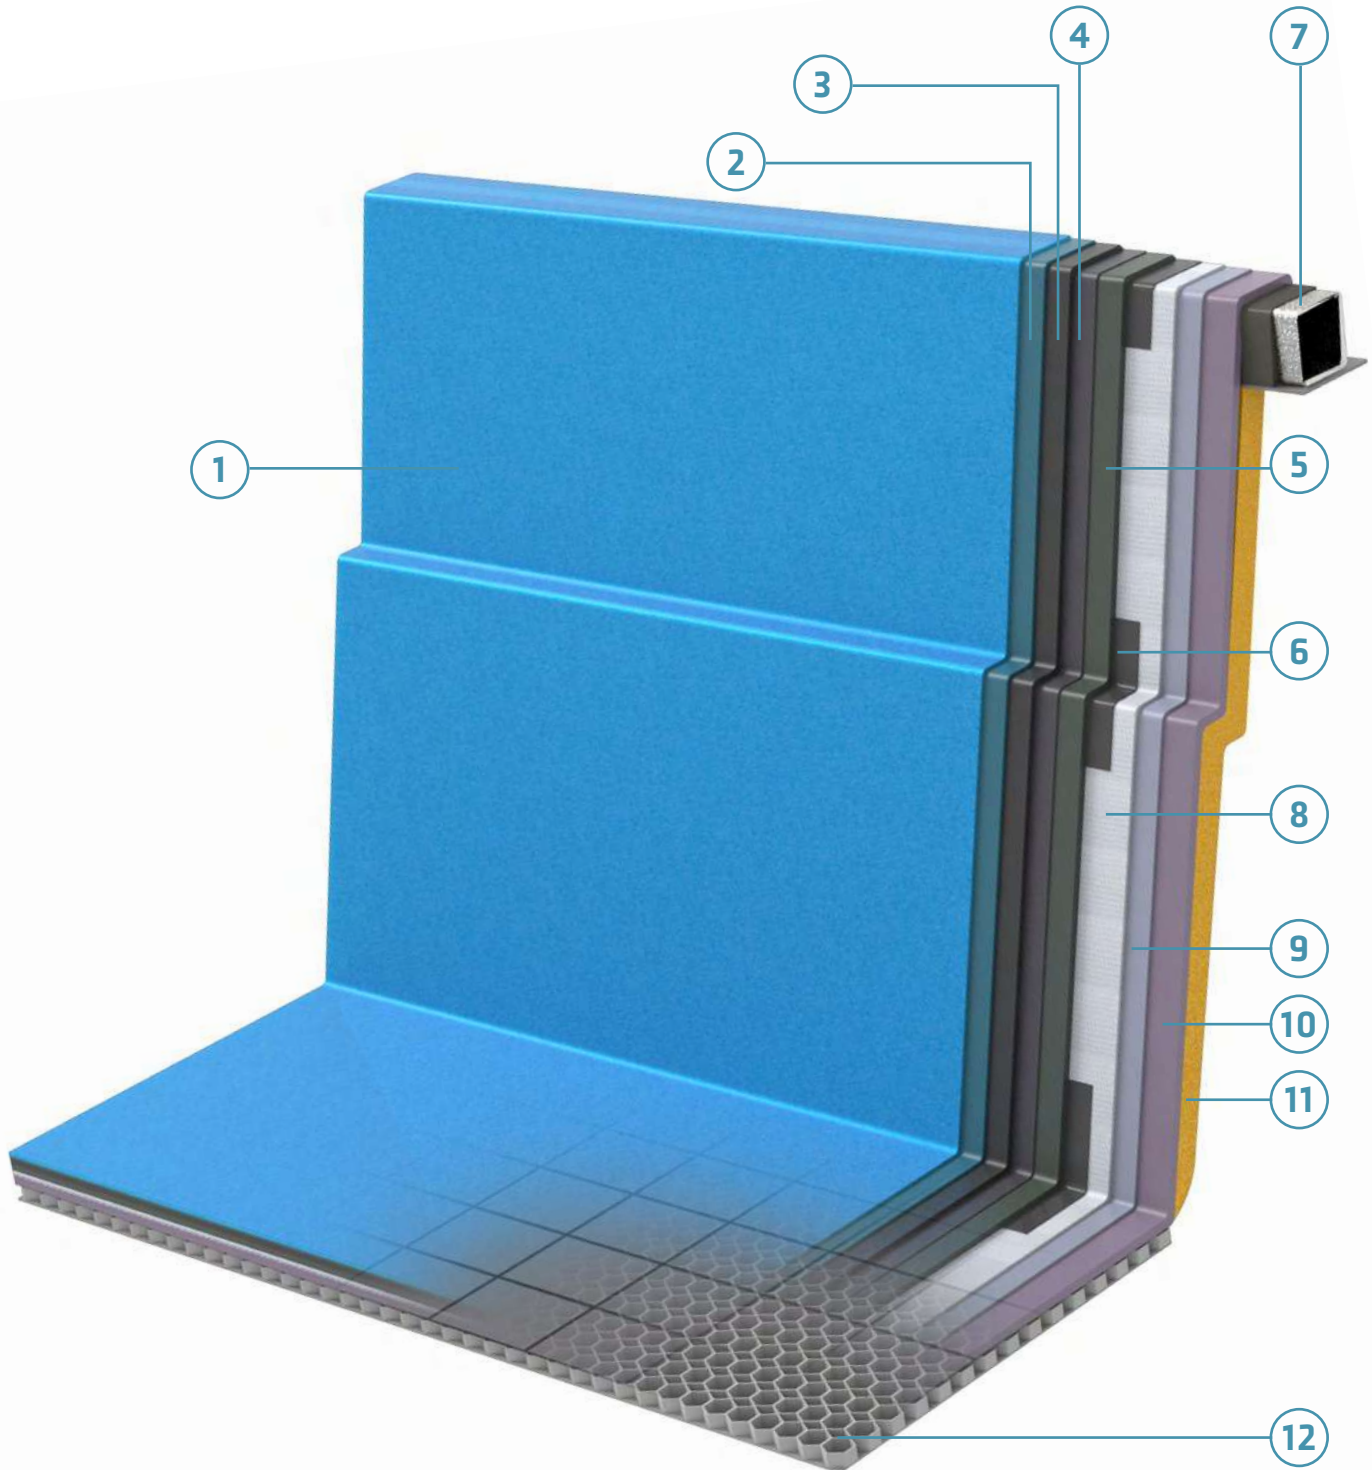

The production of fiberglass products started back in 1998 and we have developed extensive experience over the last 20 years.

All pools pass strict quality control and we can proudly guarantee that Rhino pools are leakproof for life.

POOL LAYERS

POOL LAYERS AND PROPERTIES LIST:

1 GELCOAT LAYER 1

first color tone with UV & osmose protection

2 GELCOAT LAYER 2

second color tone with additional osmosis protection properties

3 VINYLESTER GELCOAT LAYER

provides maximum resistance to chemicals and solvents

4 VINYLESTER GELCOAT LAYER 2

reinforced by fiberglass

5 VINYLESTER GELCOAT LAYER 3

has special ceramic reinforcement

6 RHINO CARBON SKIN

extra carbon fiber reinforcement layer that is applied to key places to increase rigidity

7 LAMINATED STEEL BEAM

for perimeter stability and rigidity

8 STRUCTURAL FIBERGLASS LAYER 1

9 STRUCTURAL FIBERGLASS LAYER 2

10 STRUCTURAL FIBERGLASS LAYER 3

11 PU FOAM

thermal insulation layer

12 STRUCTURAL HONEYCOMB LAYER

extra protection for pool flooring

INSTALLATION

At Rhino Pools, we believe that every customer deserves the best!

That's why we've developed a plug and play solution for every customer — our special designed pool structure allows the pool to be installed with minimal intervention in your garden.

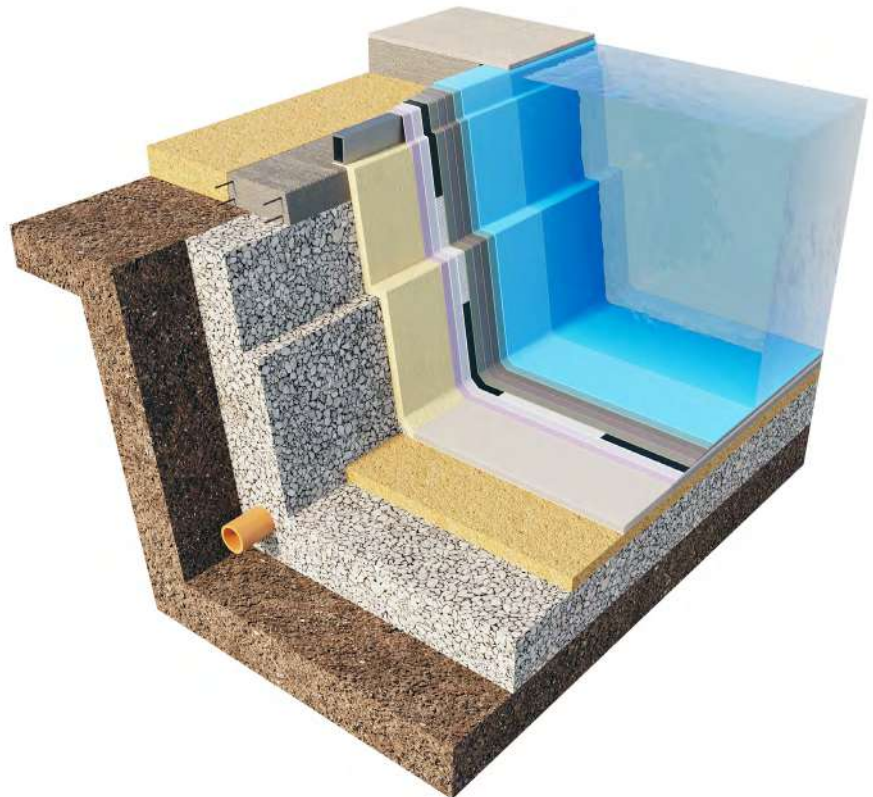

Fast and easy installation of the pool is possible only because of special designed pool structure of Rhino Pools Ceramic core, special honeycomb bottom structure and new Rhino Carbon Skin, high density PU foam, special Mat-combined structure.

You only need gravel to backfill the pool.
Both in the bottom and sides!

**EVERY POOL HAS ITS OWN
HIDDEN FEATURES:**

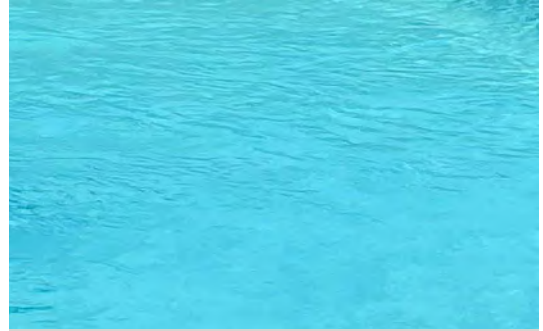

- Easy installation
- Do it yourself option
- No concrete bed required
- Only gravel backfill

FOLDABLE

HIGH DENSITY
FOAM

ANTI FOG
MEMBRANE

Soft Spa type covers for pools RIO, ENZO and JOY pool range.

4-5-piece foldable cover with lightweight aluminum frame can withstand 100 kg weight when mounted on the pool.

High-density foam with anti-fog membrane prevents heat loss and algae buildup. Soft cover is the best solution if you really want to save energy for heating and dramatically extend your season.

USER GUIDE AND MAINTENANCE

- No drilling or installing needed: just lay the cover over the pool! Only hooks for the straps should be secured
- Keep the cover clean by occasionally rinsing it with water and appropriate chemicals.
- Withstands up to 100 kg
- Foldable
- High density foam
- Anti fog membrane

MONACO PIT 650 | 750 | 850 | 1000

Monaco is an elegant and modern pool. Double sided steps allow comfortable entry, while bench between gives you enough space for lazy leisure. Special place to install underwater slat system makes Monaco PIT version universally customizable to your specific needs.

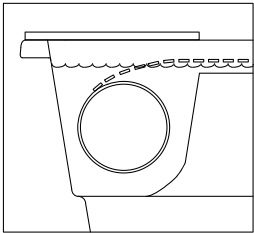

HIDDEN FEATURES:

- Anti-slip steps
- 5-step entrance
- Slatted cover guidelines
- Uninterrupted swimming channel
- Slat system keeps water warm
- Slat system decreases water evaporation
- Slat system protects against objects entering the pool
- Slat system reduces chemical consumption

MONACO PIT 1000

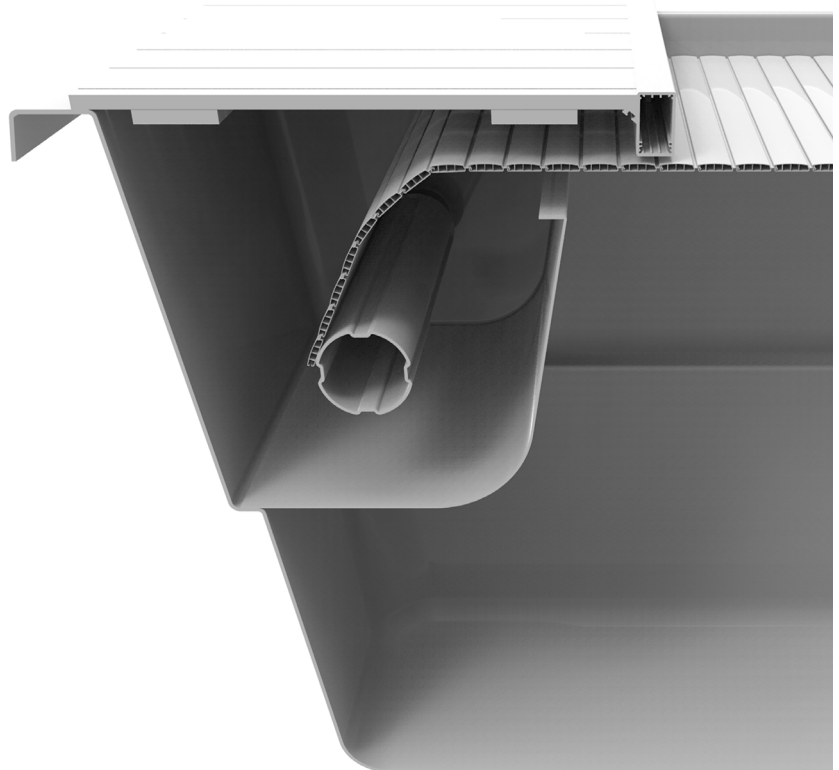

UNDERWATER STANDARD SYSTEM

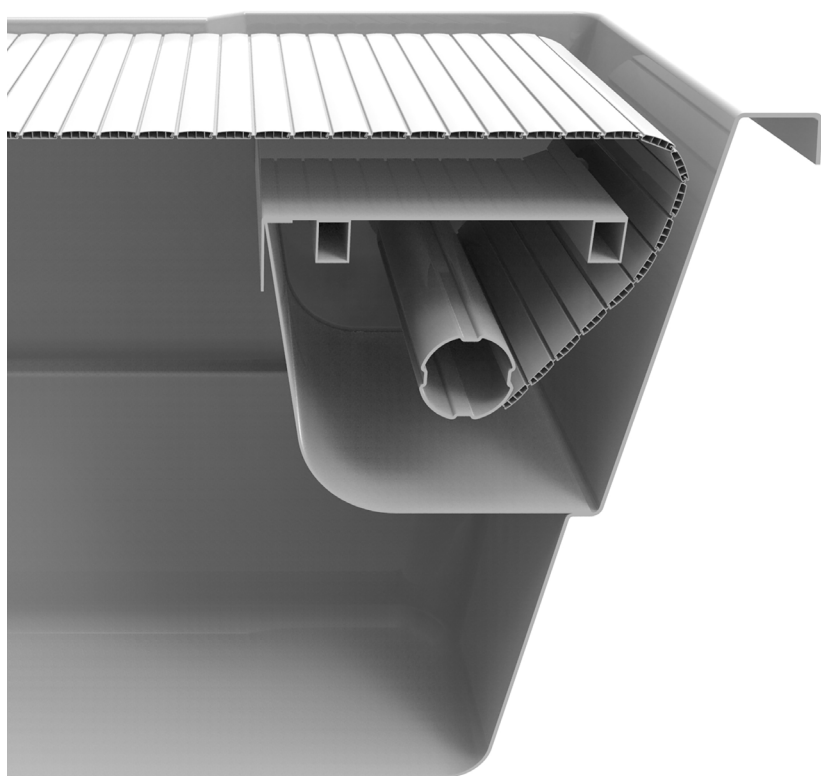

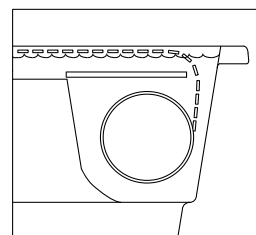

The underwater standard slat system can be installed in pools from our Monaco and Antibes ranges. The standard set includes a 140 Nm-24-IP68 fiberglass roller with pool-wall fixings, a motor control key box, a fixing kit for roller tube straps, and a 110 x 65 mm aluminium beam for top-down wood support. This cover system works with standard, 10–12 cm water-level systems.

HIDDEN FEATURES:

- Easy to install
- Keeps water warm
- Decreases water evaporation
- Extends the bathing season significantly
- Protects against objects entering the pool
- Reduces chemical consumption
- Underwater system makes the cover invisible
- Works with standart water level systems

UNDERWATER BENCH SYSTEM

The underwater bench slat system can be installed in pools from our Monaco and Antibes ranges. The standard set includes a 140 Nm-24-IP68 fiberglass roller with pool-wall fixings, a motor control key box, a fixing kit for roller tube straps, and a 110 x 65 mm aluminium beam for top-down wood support. This cover system works with both standard and high water-level systems. The submerged bench above the slat system works perfectly as a sun deck.

HIDDEN FEATURES:

- Underwater bench system provides a sun deck above the cover
- Easy to install
- Keeps water warm
- Decreases water evaporation
- Extends the bathing season significantly
- Protects against objects entering the pool
- Reduces chemical consumption
- Underwater bench system is applicable with high water level pool systems
- Bench can be replaced with stone cover

TOP ONE

Introducing the Top One, your eco-friendly slatted cover solution for a cleaner, safer, and more temperature-regulated pool. Elevate your pool experience with this top-tier cover, designed to offer both practical benefits and aesthetic finesse, transforming your swimming space into a haven for relaxation and dreams.

Crafted with a commitment to proven T&A quality at an attractive price point. Operate the cover effortlessly with a remote key switch ensuring a seamless integration into your pool environment.

Top One is the optimal choice for those seeking a slat cover without structural impact on your pool or terrace. Explore the versatility of Top One with two cover options: standard and solar versions, offering adaptability to your specific needs. Choose from two cladding colors, Polywood Oak and Plywood Graphite, and select your roller support in either white or anthracite to seamlessly blend with your pool surroundings.

Characterized by its aluminum axis, Scuba motor with mechanical end positions, and compatibility with pool dimensions up to 5m x 13m, Top One ensures optimal performance. For added convenience, a remote control is included as standard (excluding the French market).

Experience the epitome of eco-friendly pool covers with Top One – where innovation meets aesthetics, safety, and functionality.

HIDDEN FEATURES:

- Easy to install
- Keeps water warm
- Decreases water evaporation
- Extends the bathing season significantly
- Protects against objects entering the pool
- Reduces chemical consumption
- Cover operated by remote control
- Solar version with 24V connection available
- Cover cladding can be white or anthracite

ABOVE GROUND COVER

ABOVE GROUND COVER

AQUATOP

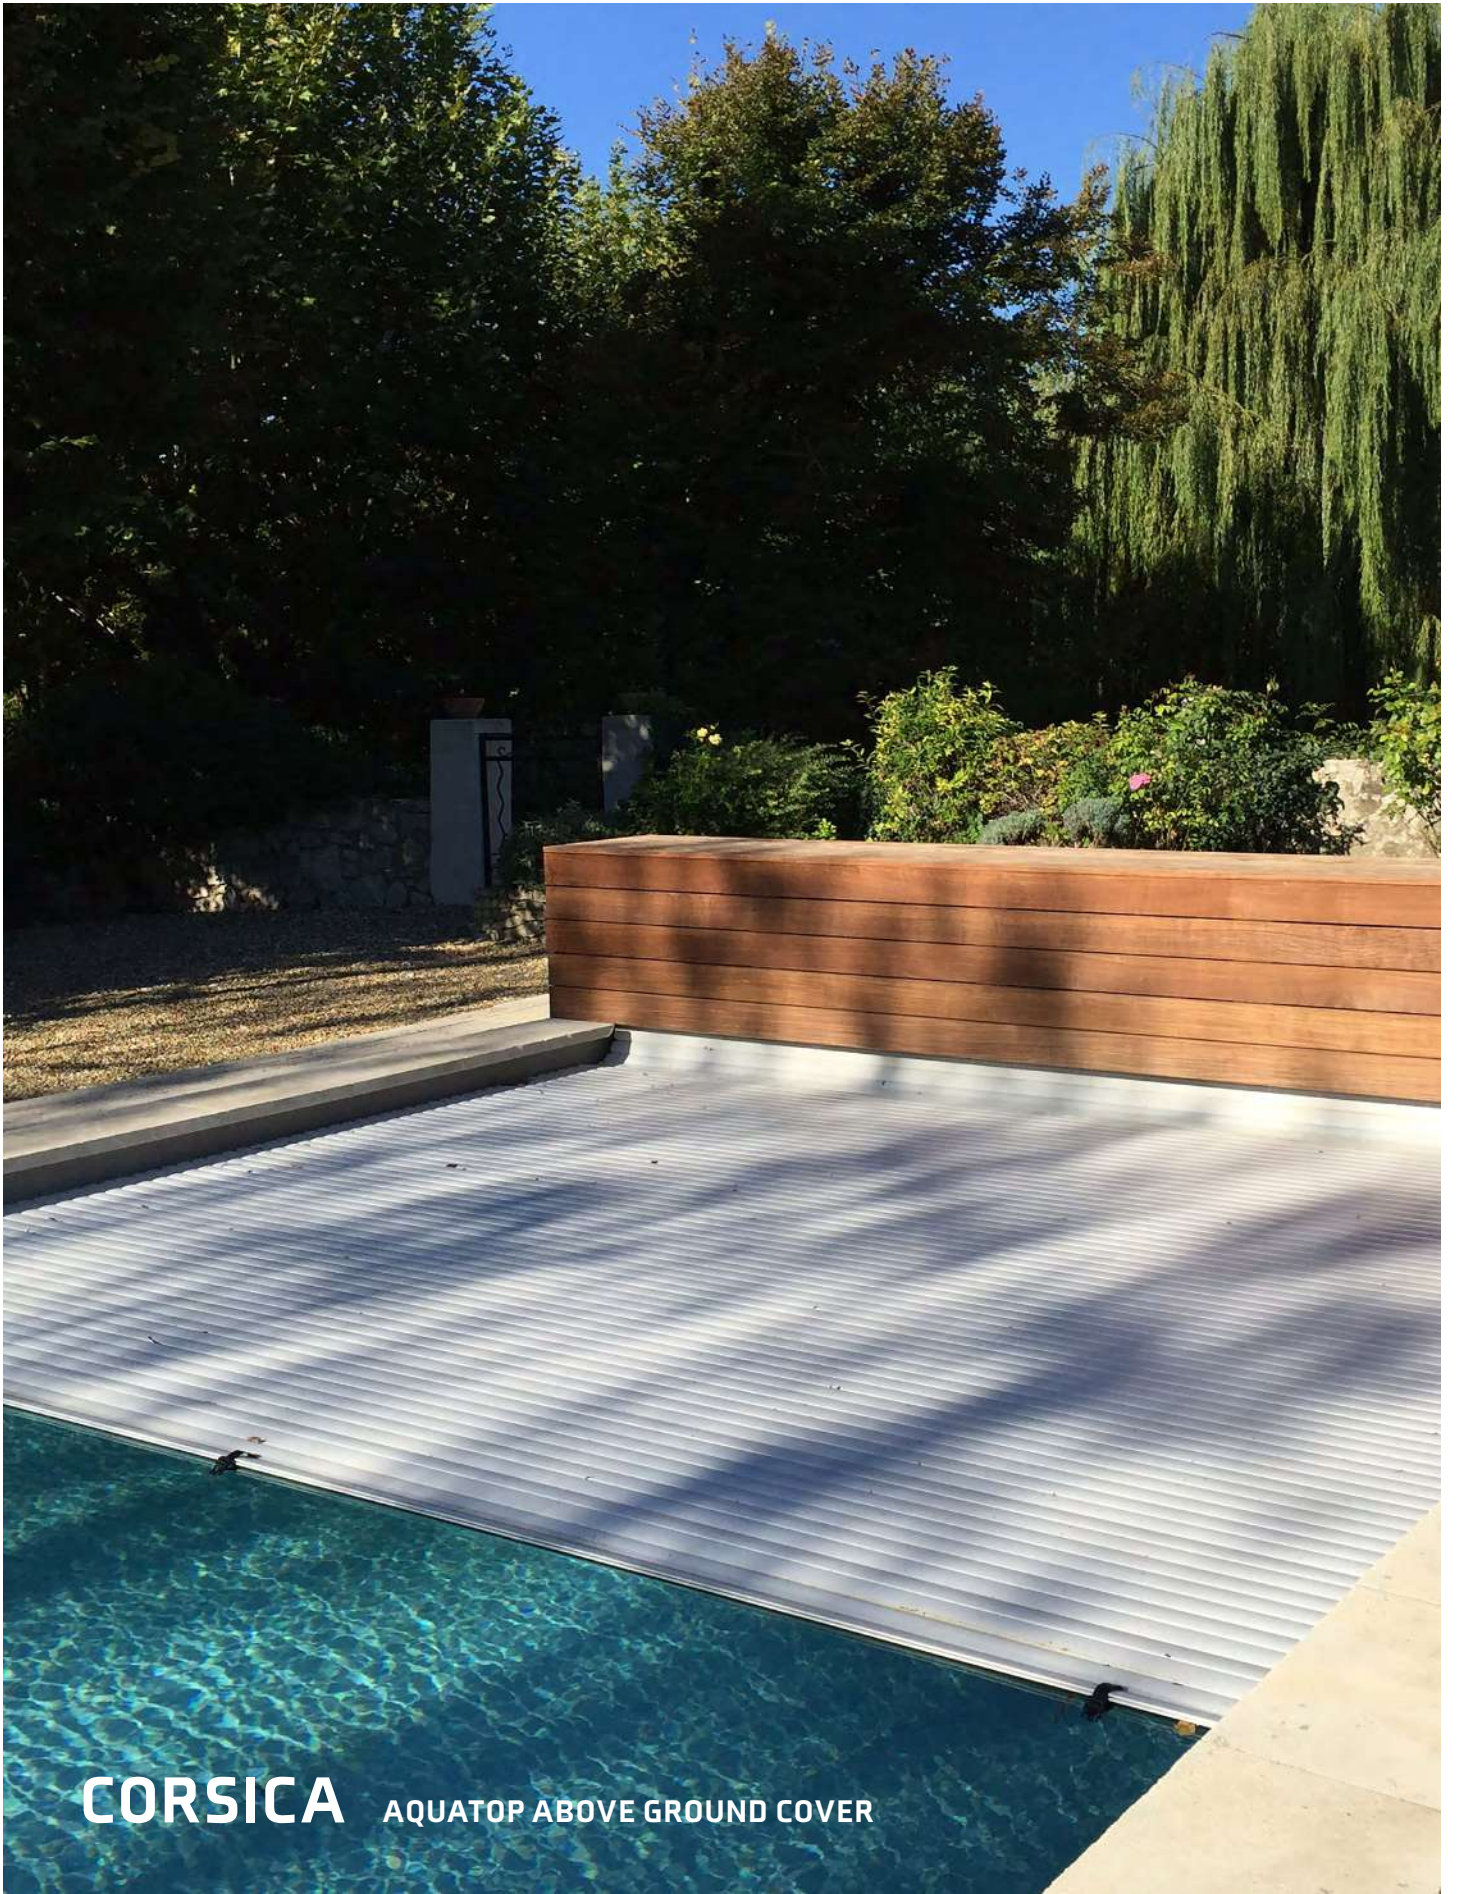

The AQUATOP is an above-ground compactible cover that comes with white or sand-coloured slats when not using a bench. With a bench cover, any type of slats can be installed. The AQUATOP cover set includes stainless steel supports, a remote-control system, and an anodised aluminium roller tube with integrated roller motor.

The AQUATOP cover complies with NF P 90-308, meeting the legal requirements for swimming pool safety. In the closed position, it's important to secure the cover using the safety buckles on both sides (or only one side for installations with a bench). When used correctly, this system has a 100 kg weight resistance.

The slat cover is installed on the edge of the swimming pool with a support on both sides. A limit switch comes as a standard feature with all Aquatop covers to guarantee the motor turning off once the cover is fully opened/closed. In order to preserve the original color of the wood, we advise you to treat it on an annual basis.

HIDDEN FEATURES:

- Easy to install
- Keeps water warm
- Decreases water evaporation
- Extends the bathing season significantly
- Protects against objects entering the pool
- Reduces chemical consumption
- Hidden roller system
- Remote control

FIBERGLASS SHELL

Our 7 layer shell concept came from long-term experience working in swimming pool production. Its design is innovative, ergonomic and most importantly – comfortable. The shell is produced from hand laminated fiberglass, finished with gelcoat. Its size is optimal for 6-8 persons use and it comes in a choice of colour – grey or white.

HIDDEN FEATURE:

- Special generation 2 gelcoat is used for better durability and performance of the shell surface

WOOD BURNING HEATER

CHIMNEY WITH A PROTECTION

AISI 316 STEEL STOVE WITH
4 MM BURNING CHAMBER WALLS

INTEGRATED 30 KW HEATING SYSTEM

At Rhino Tubs we never compromise on quality, our 30 kW stainless steel stove made from AISI 316 steel. The burning chamber is produced from 4 mm steel to ensure the long life of the system, and comes complete with chimney protection and rain cap. The stove is equipped with an easy access valve for emptying the system.

HIDDEN FEATURES:

- AISI 316 grade steel supports the usage of pool chemicals and low levels of salt
- Chimney with a protection
- Integrated wood burning heater
- High flow drain tap

SOFT RHINO TUB COVER -
DARK GRAY

RHINO TUB COVER

This cover was built to perform. An integrated support frame, high density EPS for thermal insulation anti-algae vacuum protection, an ergonomic design, and a top quality fabric finish, this cover will withstand any conditions.

HIDDEN FEATURE:

- anti-algae vacuum film protection comes as standard in all our covers

AISI 304 FRAME SYSTEM AS BASE

FRAME SYSTEM

The Rhino Tub is equipped with a structural AISI 304 stainless steel support cross underneath expanding the lifetime of the tub, wherever place it. This support also helps to level the tub during installation, maintaining an even footing throughout its life.

HIDDEN FEATURES:

- Special support pads are placed on the corners of the frame for easy levelling
- Stainless steel construction

THERMO WOOD COLOR - NATURAL OIL

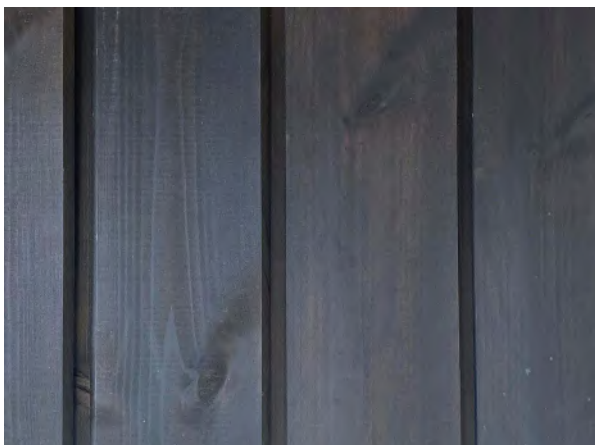

EXTERIOR WOOD FINISH

All our tubs are covered with thermo wood, making them dimensionally stable, but still giving you sensation and smell of a real wood. Extra protection is provided by the paint overcoat, with natural and black finishes available.

Wooden steps and side minibar included.

HIDDEN FEATURES:

- High endurance steel bands are applied to all our tubs for added durability
- Thermowood in Black finish
- Thermowood in Natural color finish
- Mini bar

THERMO WOOD COLOR - BLACK FINISH

STEP ENTRANCE FOR EASY ACCESS

MINIBAR

SYSTEMS

Smaller hot tubs are equipped with 6 massage jets powered by a 0,9 kW pump.

Larger hot tubs are equipped with 8 massage jets powered by a 1,1 kW pump.

These jets are ergonomically placed and their water supply system is optimized for best performance.

All systems are operated via easy access buttons on the side of the tub.

OPTIONAL - Our air massage system is powered with a 1,5 kW air blower.

OPTIONAL - A filtration system with glass media filter.
1 RGB LED light included.

HIDDEN FEATURE:

- Optimized custom built piping to maximize water and air systems

AIR MASSAGE SYSTEM:

- Powered with a 1,5 kW air blower
- 180 cm Rhino Tub has 15 jets
- 200 cm Rhino Tub has 16 jets
- All systems operated with easy access buttons on the side of the tub

HIDDEN FEATURE – Optimized piping to maximize flow in water and air systems

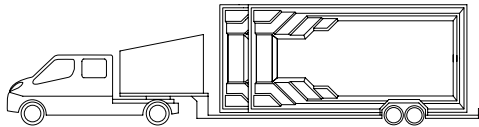

FILTRATION KIT INCLUDES:

- Special inlet and outlet in the tub for connecting the system
- Wood cover (same color as the tub) to hide the equipment
- XPERT Top Filter system from ASTRAL with glass media filter, pump, multiport valve and electrical box with timer

HIDDEN FEATURE – Wood cover works perfect for snacks and drinks serving
